

MEDIA ALERT:

Eden Biodesign's U.S. Technical Director to Present at 2009 BIO International Convention in May

Dr. Phil Ball Will Speak on Managing the Development of Unique Biopharmaceuticals

Liverpool, UK and Research Triangle Park, NC, April 21, 2009 –

Eden Biodesign, a globally-integrated provider of biopharmaceutical process development, cGMP manufacturing and consultancy services, today announced that its U.S. Technical Director for Eden Biodesign, Dr. Phil Ball, will present at the BIO International Convention in May 2009.

The BIO International Convention (May 19-21) is the largest global event for the biotechnology industry. The event attracts the biggest names in biotech, offers key networking and partnering opportunities and provides insights and inspiration on the major trends affecting the industry.

Dr. Phil Ball will speak on "Managing the Parallel Development of Multiple Unique Biopharmaceuticals." His presentation will be on Wednesday, May 20, 2009 at 11:00–11:25 a.m. at the BPI BioProcess Theater, in the Georgia World Congress Center in Atlanta. (Event website: <http://convention.bio.org>)

Specifically, Dr. Ball's presentation will address the increasingly diverse nature of biological medicines and how they continually challenge the conventional approaches during process and analytical development. Eden Biodesign offers a broad spectrum of cGMP production platforms and, therefore, are well-experienced in developing processes for the "next generation" pipeline of biopharmaceuticals. Dr. Ball's presentation will describe Eden Biodesign's strategy of maximizing efficiency, accelerating timelines and reducing risk when managing the development of novel and complex biopharmaceutical products.

About Eden Biodesign

Eden Biodesign is a globally-integrated biopharmaceutical company offering consultancy, biopharmaceutical design and cGMP manufacturing services to leading biotech and pharmaceutical clients

around the world. With a reputation for successfully commercializing biopharmaceutical products and processes, the Company offers expertise and guidance in multiple sectors. Eden's world-class facilities and knowledge in process development, manufacturing, regulatory and technology transfer support ensures Eden Biodesign offers much more than a traditional CMO.
